

Anas Adel, Senior Product Designer

Cairo, Egypt, +20 103 0698018, anassaddel@gmail.com , Website

PORTFOLIO	<u>UI Screens Library</u> , <u>Portfolio (Case Studies)</u>	
PROFILE	Senior Product Designer delivering end-to-end products across fintech, loyalty, and consumer apps. skilled in discovery, complex flows, and converted ambiguous product challenges into scalable, user-centered solutions. Partner with product and engineering to ship high quality experiences that improve activation, adoption, and retention.	
EMPLOYMENT HISTORY		
Aug 2024 — Present	Senior Product Designer, Resal	Jeddah
	• Led end-to-end product design across Resal Consumer App and Business Solution, driving major revamps from discovery to delivery to enhance scalability and experience consistency. • Owned growth experimentation across onboarding, wallet, loyalty, booking, and payment journeys, increasing activation and flow completion by reducing friction and restructuring key funnel steps. • Led the design of resalPay and end-to-end booking services, improving transaction clarity, reliability, and state management across critical flows. • Enhanced integration between Consumer and Merchant platforms, aligning payment and booking experiences into a unified ecosystem. • Introduced a Guest User Experience that reduced login-wall friction and increased signup conversion. • Designed and scaled loyalty capabilities including points aggregation and cross-partner point conversion, enabling users to consolidate and exchange rewards across partner programs. • Collaborated cross-functionally with Product, Engineering, Growth, and Business teams while mentoring junior designers to ensure scalable, high-quality delivery.	
Dec 2022 — Jul 2024	Product Designer, Dsquares	Cairo
	• Led the design and optimisation of large-scale loyalty and digital services platforms within C Cubed (Campaign management system), supporting enterprise clients and contributing to platform scalability and revenue growth. • Designed and standardised white-labeled mobile applications that reduced client onboarding time and accelerated go-to-market cycles while maintaining brand consistency and scalable architecture. • Built and evolved a unified brand style guide and reusable component system that improved cross-product consistency and increased design-development efficiency across Dsquares' ecosystem. • Delivered enterprise-grade digital experiences for ExxonMobil, Mastercard, Vodafone, and Egypt Post, enabling loyalty engagement, campaign activation, and wallet integrations that strengthened client retention and end-user engagement. • Led user research and usability validation initiatives that uncovered friction points and informed data-backed design improvements, increasing usability and feature adoption across key journeys. • Partnered cross-functionally with Product Owners, Business Analysts, Engineers, and QA teams to define hypotheses, iterate on experiments, and deliver measurable product improvements aligned with business KPIs.	

Dec 2021 — Nov 2022

Product Designer, Bypa-ss

- Designed end-to-end mobile experiences with a focus on user flows, interactions, and feature enhancements.
- Led interaction and motion design efforts to improve usability and product engagement.
- Collaborated with data analysts and product managers to support research-driven design decisions.
- Delivered branding, marketing assets, and event experiences for Wadi Degla.
- Redesigned the blog interface to align with updated design guidelines and visual consistency.

Nov 2019 — Feb 2020

Junior Product Designer, Paynas

- Supported product design through wireframes, prototypes, and UI design.
- Participated in user research and usability testing activities.
- Worked closely with developers in an Agile Scrum environment to ensure accurate design implementation.

SELECTED PROJECTS Waitery Product Ecosystem

- Consumer-facing restaurant ordering application.
- Kitchen Display System (KDS) optimizing order preparation and kitchen workflows.
- Waiter-facing application for order management and service efficiency.
- Designed a multi-product ecosystem serving different user roles while maintaining consistency and clarity across experiences.

Kode Club

- Designed first full digital experiences supporting club member engagement and operational workflows.
- Balanced business requirements with user needs to deliver clear and accessible user journeys.
- Collaborated with stakeholders to align design direction with brand and service expectations.
